Alitherm 800 Windows

# Aluminium Window Range

---

Our stunning windows encompass a timeless design together with high levels of security, energy efficiency and functionality. We offer two different window styles; a classic casement system and a modern flush casement system.

## Classic Casement Windows Alitherm 800 Series

The Alitherm 800 range is designed for both residential and commercial projects that require the highest quality aluminium products. The range is fabricated using only the best aluminium polyamide materials making it not only very thermal efficient but also a fantastic addition to any property improvement project.

## Flush Casement Windows Alitherm 800 Series

Our Alitherm 800 range is available in a beautiful flush exterior appearance. The flush style is a new design that means the window closes flush into the outer frame so it sits in line with the face of the window. The flush style is becoming increasingly popular due to its minimalistic clean lines and flat finish. The flush style is actually a very traditional design dating back more than 200 years. Back then windows were made of timber and they were all designed with flush fitting sashes and this feature is still this day today evident in many Georgian, Victorian and Edwardian properties.

## PAS 24 Security Upgrade

Our Alitherm 800 Series come with the option to upgrade the security to our PAS 24:2016 security package. PAS 24 is a set standard with specifications as to which our aluminium windows have been tested against. The PAS 24 upgrade includes hinge protectors and anti lifting blocks. The upgrade is generally mandatory on new-build projects.

## Window Furniture

---

The handles are supplied as standard with a key locking facility, however should you opt to have a window with a fire escape opening hinge then the handle will be non-locking as standard. Utilising a multipoint locking mechanism, internal key locking handles and internal beads our aluminium range offers the highest level of security as standard.
